

Direction people can feel.

Identity and applications / 2026

Wizzo is an AI momentum companion: a broad ambition becomes one clear next move, with progress made visible. This guide brings the existing identity and Living Observatory direction into practical use.

Core idea

Clarity with a sense of possibility.

Tone

Direct, encouraging and specific.

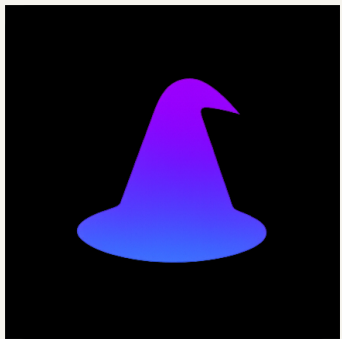

Principle

Atmosphere supports focus. Intelligence explains without pretending authority.

Existing identity. New operating guidance is pending review.

Use the real Wizzo marks.

Full wordmark and compact hat mark.

The full-color and white-wordmark assets identify the product. The standalone hat is used at compact navigation and avatar sizes. Preserve the supplied artwork and aspect ratio.

Full mark

Use the dark wordmark on light backgrounds and the white wordmark on dark backgrounds.

Compact mark

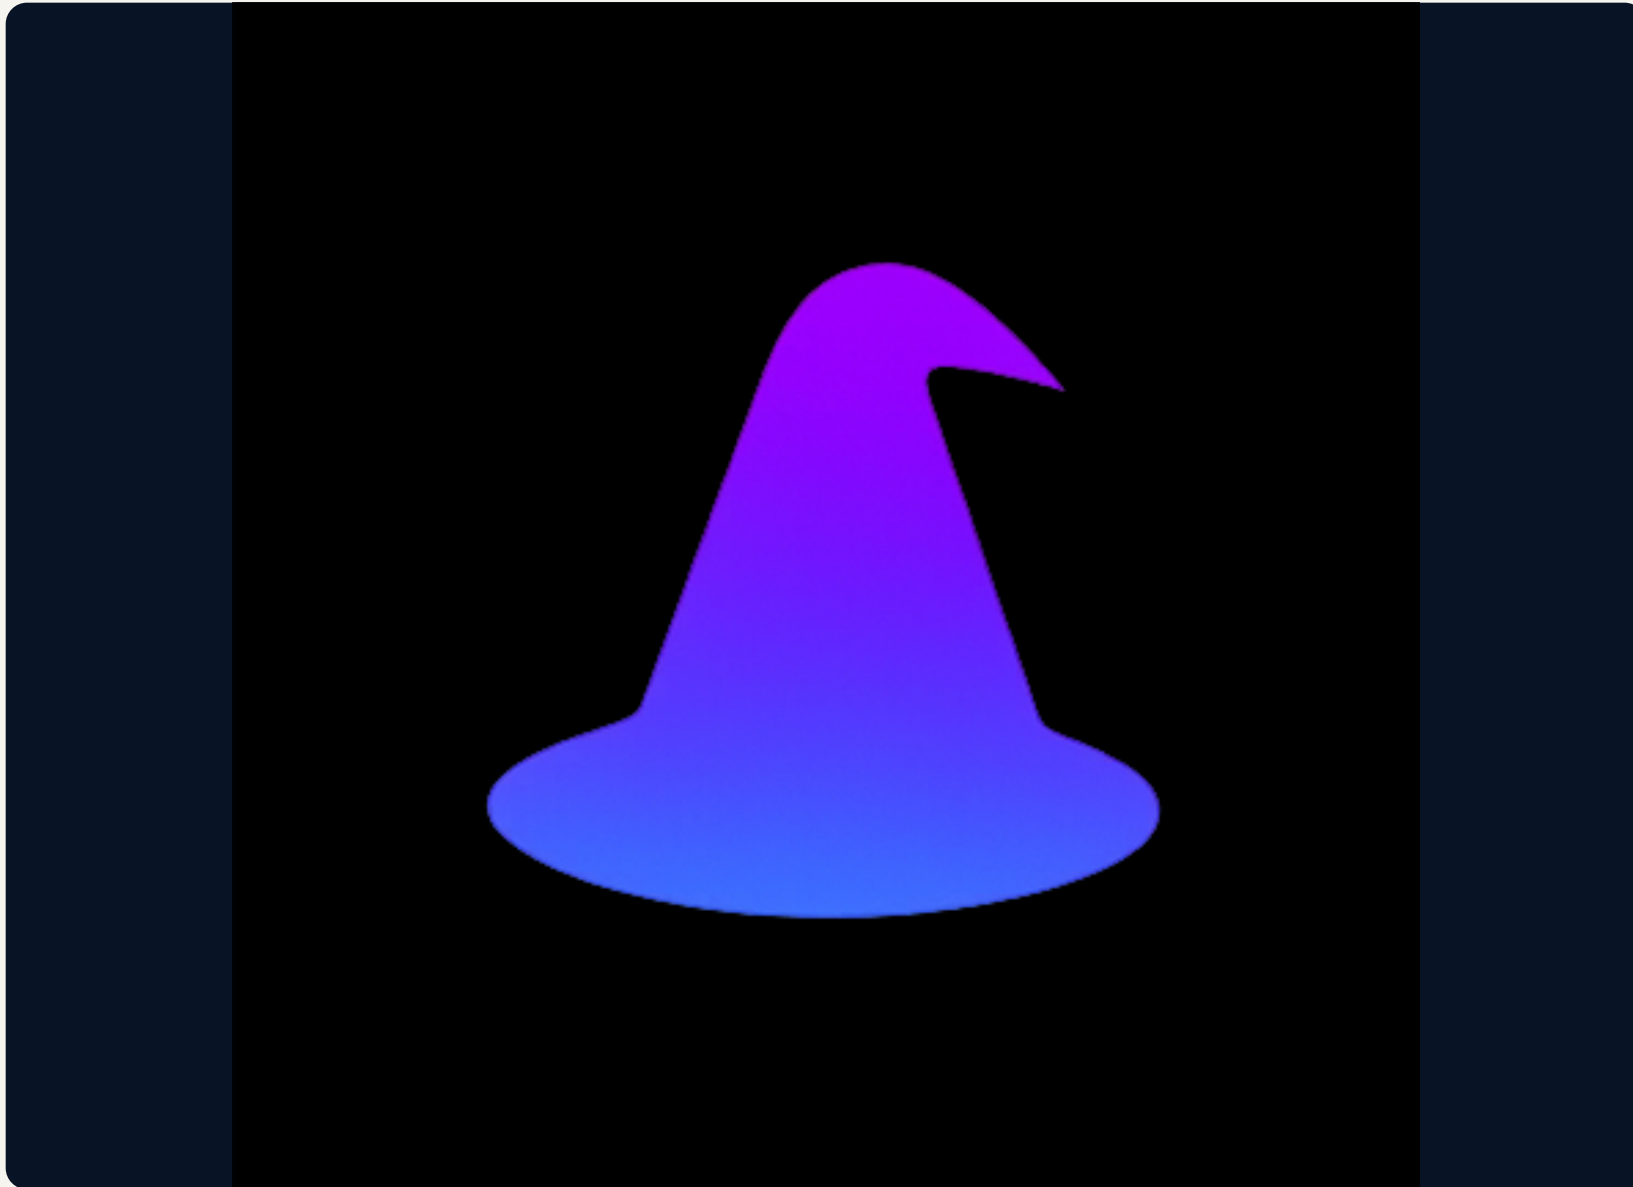

Use the hat when the name is already present or space is limited.

Distinction

The Observatory orbit icon is a navigation emblem; it is not a replacement for the Wizzo wordmark.

Protect legibility before decoration.

Practical operating rules for the existing assets.

Keep the mark separate from busy imagery and controls. Use the supplied assets without stretching, relettering, recoloring or substituting a generic wizard symbol.

Clear space

Proposed minimum: one quarter of the visible mark height on each side. Increase it near high-contrast content.

Small use

The public-site header uses a 36 px hat container. Check the visible mark at actual size; the supplied asset includes transparent padding.

Asset limits

The full-mark raster contains the original hat treatment. A future clean vector master would improve scaling; do not redraw it casually.

Assign color a job.

Depth, action, context and status.

The Observatory palette is a functional system. Void, Deep Space and Midnight form the environment. Ivory and muted starlight carry reading hierarchy. Amber identifies the main action; cyan carries context and progress.

Expression

Aurora supports the companion and expressive moments.

Status

Success, caution and danger accompany specific meaning and text.

Restraint

Do not use every accent together or assign competing primary actions equal emphasis.

Character for display. Clarity for work.

Cinzel + Inter.

Cinzel gives major headings the Observatory character. Inter supports labels, reading, navigation and controls. Keep display text brief and let long content use the working face.

CINZEL / DISPLAY CHARACTER

Inter / Working clarity in labels, controls and body copy.

Display

Source Home headings use Cinzel 600 with tight leading. Figma uses available Bold 700 as a documented approximation.

Working text

Inter 400 for body; stronger weights for labels and controls. Source 750 treatments are approximated by Figma 700.

Content

Use sentence case for most UI copy. Avoid long all-caps sentences and ornamental tracking in body text.

Encourage an action. Explain a consequence.

Specific language builds trust.

Use language that makes the next action and its result easy to predict. A warm voice does not require inflated praise or invented certainty.

Use

"Snoozed to tomorrow." "Review the move."
"The move was not saved."

Avoid

Unsupported confidence, claims about a person's inner state, and vague "something went wrong" messages.

Position independence

Name the destination or action. Avoid "alternatives below" when the layout can place them beside the recommendation.

Wisp belongs to the experience.

A shared visual and behavioral family.

Wisp is the astral companion, not the corporate logo. Its warm core, asymmetric silhouette and ribbon-like form remain recognizable across eight states and four size tiers.

Role

Guide attention and acknowledge progress.

State

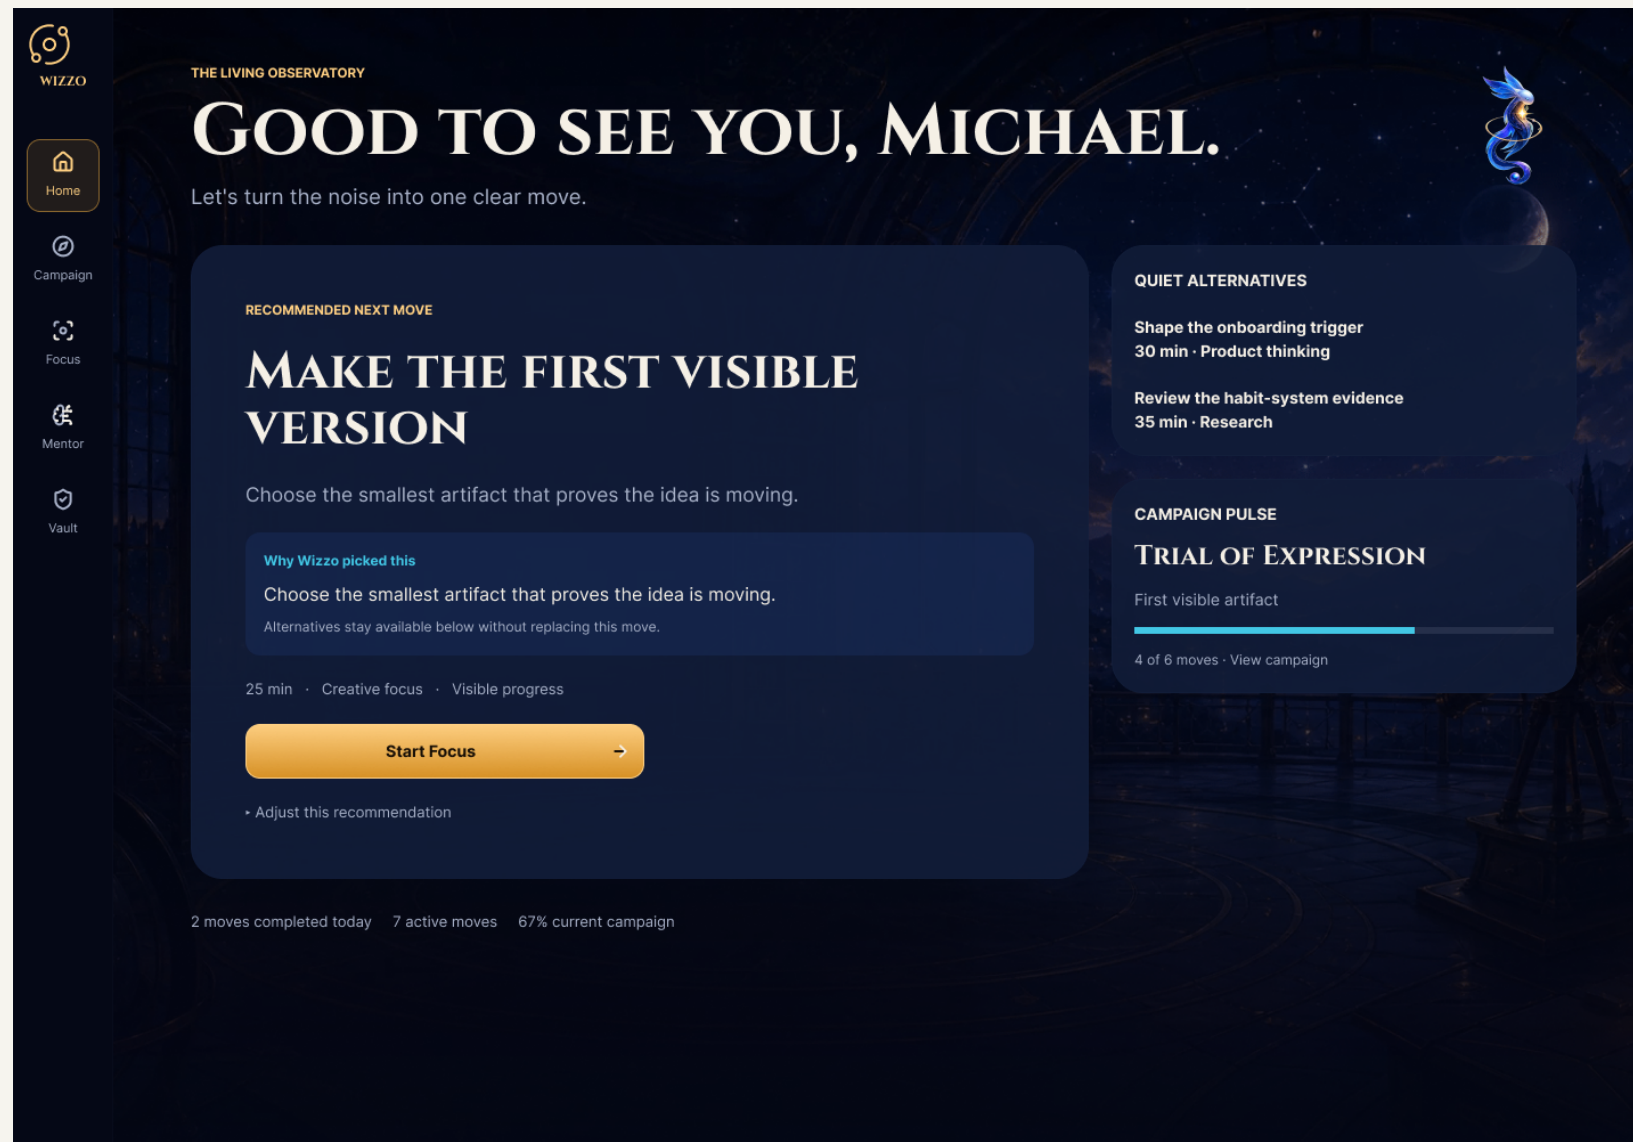

Use product state as the input; essential status stays available in text.

Restraint

Limit motion and scale so the task remains primary.

An expressive product, a quiet reading surface.

Home demonstrates the identity in use.

A dark Observatory scene provides depth behind the interface. The primary card gives the task a quiet surface. Amber marks the entry point, cyan organizes supporting context, and the companion occupies a bounded area.

Hierarchy

One primary action per decision area.

Layout

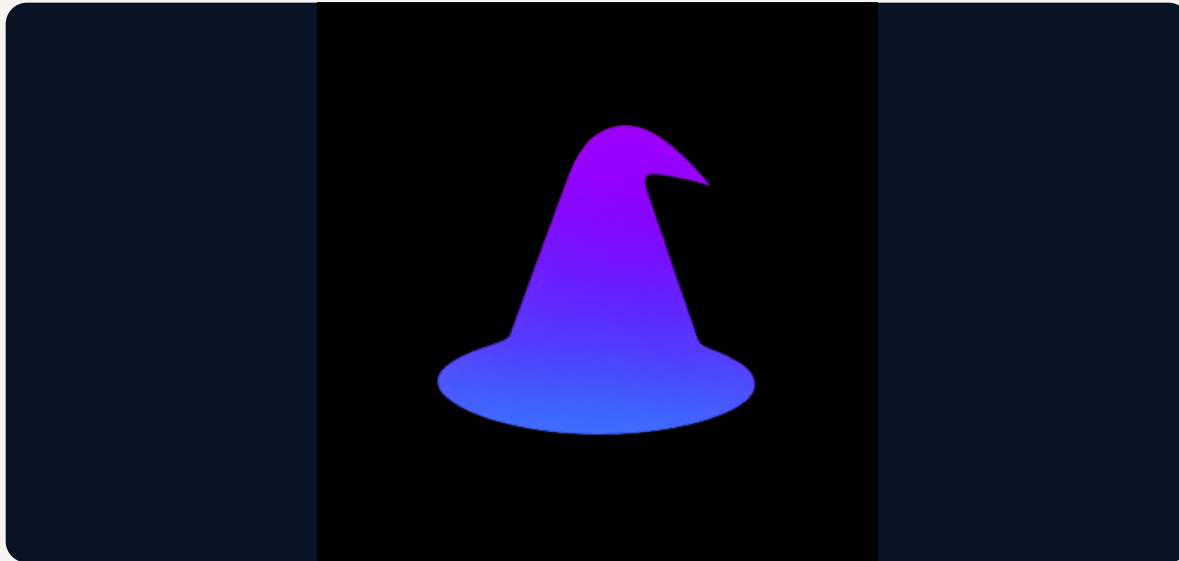

Use generous separation between task, alternatives and broader progress.

Consistency

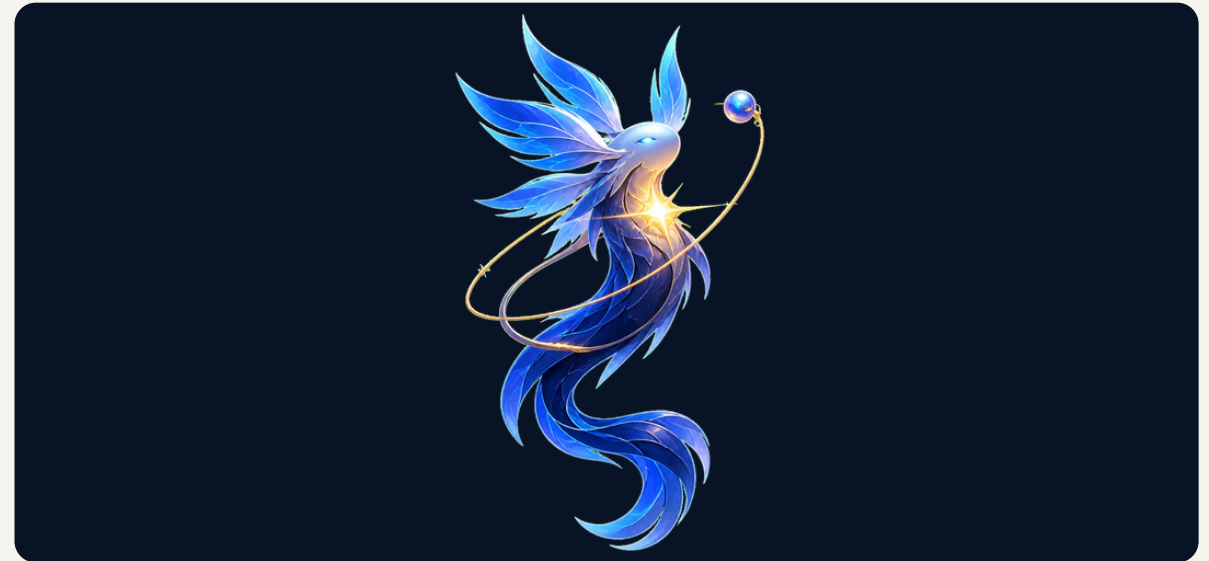

Carry the same text, surface and status roles into onboarding and recovery.

Compact identity still needs room.

Header, avatar and confirmation use.

Hat mark

Celebrating

At small sizes, use the existing hat with a clear product name or accessible label. At larger product moments, use Wisp to provide presence. Brand expression should never be the only explanation of what changed.

Navigation

Observed public header: 36 px hat plus Wizzo text and a labeled home link.

Avatar

Use the hat asset in the chat avatar context where appropriate.

Confirmation

Combine restrained celebration with explicit confirmation text and continuation.

Maintain one identity.

Source mapping and review checklist.

The guide consolidates existing product direction and assets. Proposed clear-space guidance is a new operating recommendation; it is not presented as a historical standard.

Identity files

apps/web/public/wizzo_logo_color.png;
wizzo_logo_white.png;
wizzo_logo_hat_color.png.

Product direction

docs/design/WIZZO_LIVING_OBSERVATORY_V1.md and WISP_COMPANION_V2.md.

Application review

Check the actual-size mark, background contrast, type hierarchy, one primary action and state text before accepting an application.
